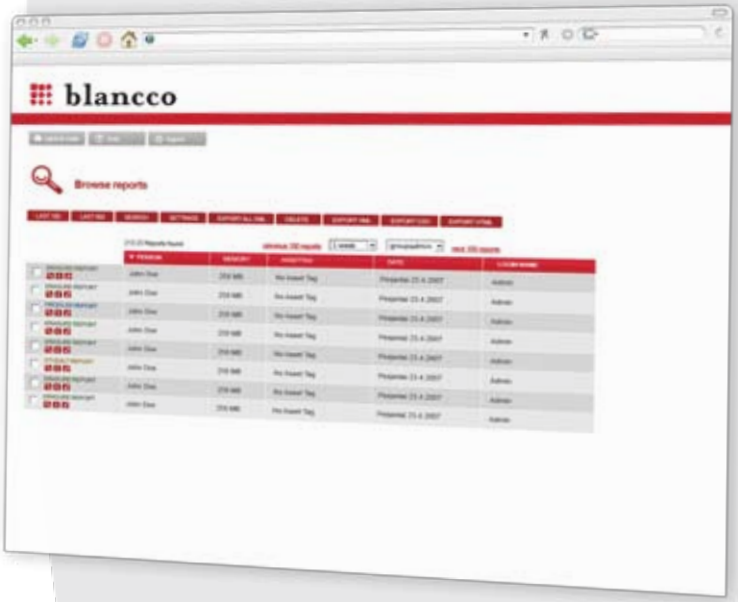
WHY CHOOSE BLANCCOSERVICE.COM?

Blanccoservice.com offers a hosted management console for those not needing the large volume capacity of Blancco Management Consoles and provides the same functionality conveniently online. It is a unique centralised solution designed to handle data erasure software distribution, hardware asset management and erasure reporting over the internet.

- Complete online managed service for operating, managing and following up on the erasure process.
- Provides the ability to distribute licenses easily in a global manner.
- Requires minimum effort in report distribution to different customers.
- Compatible with all Blancco data erasure software v4.5 and above.

KEY FEATURES


- Offers unprecedented flexibility to manage the erasure process and reporting.
- Enables the administrator to distribute the software and grant user rights to operators who will perform the secure erasure and send the reports to the management console database.
- Comprehensive reports can be browsed, imported, exported, deleted or modified by different users depending on the user rights, which have been assigned to them by the administrator.
