

# Mobile Diagnostics & Erasure for Mobile Processors

**Purpose-built to improve operational efficiencies for mobile processors, warehouses, and resellers that process high volumes of mobile and IOS and OS Wear wearable devices before they enter the secondhand market.**

## Why Mobile Diagnostics & Erasure

Blancco Mobile Diagnostics & Erasure allows mobile processors to easily, quickly and accurately process used mobile devices to identify any issues and determine overall value. By incorporating Blancco's diagnostic and erasure software, mobile processors will automate processes, deliver intelligent routing based on device attributes and increase overall efficiency, while driving incremental revenue and profitability.

\* Exception: 'Trust device' will have to be pressed manually when installing the BMDE diagnostics app.

\*\* iOS 16+ devices may need to be tapped to launch the app

With Blancco Mobile Diagnostics & Erasure (BMDE), you get the fastest, most effective iOS and Android erasure (with validation) on the market, as well as a full suite of easily configurable diagnostic tests to fit your organization's needs.

### Key Benefits

- ▶ Identify key locks and determine device value quickly so operators can route devices faster, including IMEI, FMIp, rooted/jailbroken checks, genuine parts authentication, and carrier locks\*\*
- ▶ Perform diagnostics easily using the device screen, the processing station, or both
- ▶ Track devices across their full lifecycle (e.g., carriers can track actions taken by remanufacturers)
- ▶ Choose from 24 erasure methods, including NIST 800-88 Clear & Purge, Factory Reset, and Aperiodic Random Overwrite
- ▶ Produce a tamper-proof audit trail, backed by Blancco's digitally signed Certificate of Erasure

### Key Features

- ▶ iOS Express Setup – Bypasses UI setup with full automation, reducing processing times\*
- ▶ Android Express Setup – Automates the setup of the device via a QR code or NFC tag, saving processing time
- ▶ Full support for Apple Watch, Android Wear OS diagnostics and erasure — now with AirPods authentication
- ▶ The autotrust and autotrust feature for the iOS diagnostics app is highly effective when processing many devices simultaneously\*\*
- ▶ Leverage industry-leading damaged screen detection using any mirror or a Blancco screen test appliance
- ▶ eSIM detection and erasure

Plus, with Blancco Mobile Workflows, you can create simple or complex workflows for grading, erasure, and diagnostics—all while easily integrating Blancco within your existing systems.

### Blancco Mobile Workflows

- ▶ Automate processes across the mobile lifecycle
- ▶ Customize the diagnostics tests with questionnaires leveraging intelligent decision making
- ▶ Integrate with your current systems (e.g., WMS, ERP)
- ▶ Access numerous templates for grading and diagnostic
