Data Erasure for Financial Services: The Last Line of Defense in Data Security

Financial institutions are prime targets for cybercriminals. As threat patterns evolve and become more sophisticated, your organization needs solutions that protect your data—and reduce the attack surface before a breach occurs. Blancco's data erasure solutions provide a last line of defense for data security with certifiable data erasure.

## Reduce Risk by Automating Data Erasure in the Cloud

- Through scripting and scheduling, erase files and folders on virtual machines, active storage and hypervisor environments according to your policies and requirements
- Erase data without disrupting business operations

- Blancco File Eraser
- Blancco LUN Eraser
- Blancco Virtual Machine Eraser

Verify Data Erasure on HDDs and SSDs at End-of-Life

- Erase sensitive data from drives with Blancco's certified data erasure methods, including our patented, solid-state drive erasure method
- Detect and verify that all hidden areas (DCO, HPA) and remapped sectors have been securely erased

- Blancco Drive Eraser
- Blancco Mobile Diagnostics & Erasure
- Blancco Removable Media Eraser

Prove Compliance with Certified Reports for Every Verified Erasure

- Manage data erasure across all IT assets within a single program for consolidated reporting
- Create and store reports for compliance, audits, reporting, verification and retention purposes

- Blancco Management Console

Blancco Helps You Stay Compliant

Blancco helps organizations stay compliant with these common regulations. For data erasure needs outside of this list, contact us. Our software is designed to integrate into your existing infrastructure to automate data erasure based on your specific regulations and policies.

Satisfy global privacy regulations by erasing customer data and prove the secure disposal of consumer data from the IT equipment that contains it when it is sold, donated or transferred.

Show auditors that you have controls in place to safeguard financial data, and securely erase it when the time is right.

Why Blancco For Financial Services?

We understand the need for heavily-regulated industries to stay compliant with local and federal regulations. That's why we heavily invest in having a global team composed of industry-leading experts in research, development and support to ensure you satisfy (and exceed) data protection requirements.

Certified and Tested

As the industry leader in certified data erasure, Blancco data erasure solutions:

- Support 25+ certified erasure methods in our applications
- Comply with all relevant NIST sanitization guidelines, including meeting purge requirements for HDDs and SSDs erasure
- Have been tested, certified, approved and recommended by 15+ governing bodies around the world
- Comply with the most rigorous requirements set by government agencies, legal authorities and independent testing laboratories

Ongoing Maintenance and Support

Blancco's tailored support options provide reliable and timely resolution of technical inquiries. Our support team provides:

- Access to Blancco's support portal, which contains a knowledge database, product bulletins, product manuals and documentation
- Problem-solving assistance via phone, support portal or email with one of Blancco's product experts
- Automatic software updates of minor enhancements in functionality and features
- A dedicated technical account manager that ensures fixes, requests and issues are prioritized*

Research and Development

The pace of innovation for technology is fast. That's why we invest heavily in research and development. This means:

- We have a unique solid-state drive (SSD) data erasure patent
- We invest heavily in innovation, so we stay ahead of the competition
- We offer the most comprehensive erasure solutions on the market today
- We keep pace with the latest market trends and regulatory requirements—so you don't have to

Certified Technical Engineers

For faster deployments, certified technical engineers will:

- Install and configure your solution across devices
- Train your staff either onsite or remotely
- Develop automated erasure processes using Group Policy Objects (GPOs) in Windows environments to erase files and folders
- Provide you with the experience and expertise to comply with the most challenging regulations

Technical engineers are available with the Enterprise Support Plan. Contact a representative to learn more.
