Blancco Drive Eraser ensures complete sanitization of data on HDDs, SSDs and servers through a globally-certified and recommended process.

Every instance of Blancco Drive Eraser comes with the ability to customize this solution based on your organization's specific requirements through direct access to your ISO. Included with Blancco Drive Eraser (at no additional cost), enterprises and IT asset disposition vendors can now customize as many ISOs as they desire, with the ability to create different templates based on use cases, locations and business needs.

Automate Erasure Processes

Automate

- Securely erase HDDs, SSDs, and NVMes, including hidden sectors, with a single automated process from start to finish.

- Plug-and-play system requires zero user interaction after the process is initiated.

- Take advantage of direct access to the ISO to make configuration changes; no interfacing with Blancco required.

- Choose from automatic, semi-automatic and manual user interaction options.

- Securely track erased assets from one location to the next with our Asset Report and fingerprint features.

- Add unlimited custom fields to meet your organization's specific requirements.

- Automatically send erasure reports to the cloud or hosted on-premise management console for compliance.

Increase Efficiency

Standardize Operations and Deployment

- Customize ISO files to your security settings, goals and requirements.

- Standardize data erasure globally by creating, customizing and saving a master ISO file that can be distributed to other sites.

- Streamline data erasure regardless of operating system or manufacturer.

- Deploy the ISO online or offline via CD, USB, PXE or MSI.

- Configure Blancco Drive Eraser through Intelligent Business Routing (IBR) workflows

Prove Compliance

Provide an Audit Trail of Compliance

- Select from 25+ overwriting standards, including NIST and DoD.

- Certify every erasure with a tamper-proof report that's automatically created and saved at the end of the erasure process.

- Customize reporting to your specific policies and requirements.

- Automate and standardize the data erasure reporting process across all your locations.

- Automatically detect SSDs and use our patented process to ensure secure erasure.

- Create custom reporting views in the BMC to easily filter through specific configured values.

Why Blancco

Blancco Technology Group provides organizations with secure, compliant, and automated solutions that accelerate the transition to the circular economy.

All erasures are verified and certified through a tamper-proof audit trail. With nearly 25 years of responding to customer needs and 35+ patented or patent-pending ideas, Blancco is the industry standard in data erasure and mobile lifecycle solutions. Our dedication to technological innovation empowers toptier enterprises, IT asset disposition (ITAD) vendors, and mobile industry stakeholders to protect end-of-life data against unauthorized access, comply with data protection requirements, extend the useable life of IT assets, accelerate operations, and enhance the mobile customer experience.

No longer must organizations get permission to customize their erasure software; Blancco gives you the keys to our Drive Eraser solution. You'll have full-access to modify it to your organization's specific security settings, goals and requirements—with the ability to automate and standardize your erasure processes across an unlimited number of locations and uses.

Deploying ISOs to Techs at Different Locations

Although the software comes plug and play, you can minimize human error and standardize global processes by configuring the ISO to your organization's operational and security requirements. To deploy your ISO customizations across various locations, you can create a master ISO using our configuration tool. Once configured, the master ISO can be distributed to erasure sites across the country or globally. Once the process has been initiated in these locations, it can be completely automated from start to finish. Little to no training is required, and the result is mitigating risk of human error, while maintaining a high level of operational efficiency.

Ensure Complete Data Sanitization in Every Instance

Our 3rd-party verified HDD and patented SSD erasure software gives organizations the ability to securely erase a wide variety of drives, including PCIe and NVMes. In addition, Blancco Drive Eraser ISO offers the following options and benefits:

- ☑ Preserve recovery partitions
- ☑ Set up automated erasure report backups
- ☑ Choose to enable automated and user-interacted hardware tests for PCs and laptops
- ☑ Set failure threshold numbers for failed and/or remapped sectors of drives that cannot be overwritten
- ☑ Access and overwrite manufacturer hidden areas of drives and erase remapped sectors as needed
