

Blanco File Eraser

The first solution Common Criteria certified to permanently remove files on PCs, laptops and servers

Why Blanco

Blanco is the industry standard in data erasure and mobile device diagnostics software. Blanco data erasure solutions provide thousands of organizations with the tools they need to add an additional layer of security to their endpoint security policies through secure erasure of IT assets. All erasures are verified and certified through a tamper-proof audit trail.

Blanco data erasure solutions have been tested, certified, approved and recommended by 15+ governing bodies and leading organizations around the world. No other data erasure software can boast this level of compliance with the rigorous requirements set by government agencies, legal authorities and independent testing laboratories.

[View Our Certifications](#)

Blanco File Eraser ensures full compliance and enhanced security by automating data erasure routines that selectively erase data on active PCs, laptops and servers.

Blanco File Eraser makes it easy to automate a certified data sanitization process for files and folders that become redundant, obsolete or trivial on active PCs, laptops and servers.

Backed by the testing and certification of Common Criteria, Blanco File Eraser allows your organization to easily manage, automate and certify data erasure routines. This reduces user errors, while enhancing security and compliance.

Key Benefits

Supports erasure of multiple file types: free space, recycle bin, regular files, temporary files, etc.

Securely Erase Data in Live Environments

- Automated, targeted erasure prevents the leakage of sensitive data.
- Use internal and external policy-based scheduling by implementing rules and automatic routines to securely erase files and folders according to your internal security policies or external regulations.
- Supports both Windows and Linux operating systems.
- Avoid the need for system downtime during the erasure process.

Safely Monitor and Report on all Erasure Activity

- Validate compliance among national and international regulatory bodies, including PCI DSS, EU GDPR and HIPAA, and utilize advanced reporting features to ensure a tamper-proof audit trail.

Refine Internal Processes and Improve Transparency

- Save time and resources with easy installation onto existing systems with remote installation and deployment.
- Take advantage of task automation capabilities, which allow automated erasure and increased productivity.
- Help strengthen knowledge and awareness of internal policies and processes across the business with scheduling and integrated erasure routines.

Technical Specifications

ERASURE	INSTALLATION & USER MANAGEMENT	
<ul style="list-style-type: none"> • Erase a variety of files from programs like Microsoft Excel, Word and PowerPoint • Overwrite selected files (including previous versions stored by Windows), free disk space, temporary files and the recycle bin • Instantly erase files via drag-and-drop from the desktop to Blancco File Eraser • Erase files and folders on local computers • Remotely execute secure erasure of files and folders on servers and in storage areas across the network • Supports all global data erasure standards 	<ul style="list-style-type: none"> • Easy installation on PCs and servers (both physical and virtual machines) • Remote installation and deployment available through MSI packages using Active Directory - for "silent installations" on to any machine • Central configuration of clients and multiple installations through Group Policy files • Easy-to-use user interface and advanced command line interface supporting multiple parameters for full flexibility of integration • Can be run from a standalone USB stick when plugged into a computer or server for easy mobility and on-demand operations • Supports centralized licensing through Blancco Management Console 	
AUTOMATION & SCHEDULING	REPORTING	
<ul style="list-style-type: none"> • Schedule erasure of selected files on local or remote servers and workstations • Implement rules and automatic routines to erase files and folders • Enable policy-based scheduling and integration through Windows standard components • Improve user interaction with multiple configuration alternatives available 	<ul style="list-style-type: none"> • Reports ensure compliance with standards and legislation like PCI DSS, which requires erasure of file-level data • Centralized, digitally-signed and tamper-proof report options • Detailed PDF or CSV reports for easy viewing and XML files for centralized reporting • Full support for the Windows event log • Add custom fields (user-defined inputs, e.g. internal batch IDs, workstation numbers, etc.) in reports according to process requirements • Detailed reporting includes everything needed for compliance such as security information, user data, file names and exact times • Reports sent automatically to Blancco Management Console as soon as the computer is online in the network 	
HARDWARE SUPPORT	AUDITING	LANGUAGE SUPPORT
<ul style="list-style-type: none"> • Windows 10, 8.1, 8, 7 • Windows Server: 2012, 2008 all versions (with licensed Data Center Edition) • Supported file systems are NTFS, FAT32 and exFAT • HP-UX 11.11 and HP-UX 11.31 with VXFS • AIX 5.1 or later with JFS or JFS2 • Solaris 	<ul style="list-style-type: none"> • Full integration with Blancco Management Console for automated updated, detailed auditing and control to ensure full compliance 	<ul style="list-style-type: none"> • English, French, Spanish, German, Japanese and Chinese (Simplified) <p>Please ask your Blancco sales representative for details.</p>
