

# Blancco Mobile Diagnostics & Erasure for Mobile Processors

Improve operational efficiencies at scale for mobile carriers, mobile processors, 3PLs, recyclers and repair and refurbishment operations.

## Why Mobile Diagnostics & Erasure

Blancco Mobile Diagnostics & Erasure allows mobile processors to easily, quickly and accurately process used mobile devices to identify any issues and determine overall value. By incorporating Blancco's diagnostic and erasure software, mobile processors will automate processes, deliver intelligent routing based on device attributes and increase overall efficiency, while driving incremental revenue and profitability.

Blancco Mobile Diagnostics & Erasure (BMDE) is purpose-built for mobile warehouses and resellers that process high volumes of mobile devices before they enter the secondhand market. With BMDE, you get the fastest, most effective iOS & Android erasure (with validation) on the market, as well as a full suite of easily configurable diagnostic tests to fit your organization's needs. Plus, with Blancco Mobile Workflows, you can create simple or complex workflows for grading, erasure and diagnostics—all while easily integrating Blancco within your existing systems.

## Key Benefits

- Bypass UI setup with full automation, reducing processing times for iOS devices \*
- Recognize iOS devices with unauthorized parts installed, giving insight into functionality issues stemming from non-authorized repairs.
- Perform e-Sim erasure (on iOS devices only).
- Choose from 13 erasure methods, including Factory Reset and Aperiodic Random Overwrite
- Track devices across their full lifecycle (e.g. carriers can track actions taken by re-manufacturers)
- Produce a certified tamper-proof audit trail, backed by Blancco's digitally-signed Certificate of Erasure and customized reports
- Identify key locks and determine device value quickly so operators can route faster, including IMEI, FMIp, Rooted/Jailbroken checks and carrier locks \*\*
- Implement data wipe support for iOS and Android wearable devices
- Leverage industry-leading damaged screen detection using any mirror or a Blancco Screen Test appliance
- Receive automated detection of fake Android devices.

## Blancco Mobile Workflows

**Create custom workflows that guide operators to grade, value and sort each device according to your policies and requirements**

- Automate processes across the mobile lifecycle
- Integrate with your current systems (e.g. WMS, ERP)
- Access numerous templates for grading and diagnostics

\*Exception: 'Trust device' will have to be pressed manually when installing the BMDE diagnostics app.

\*\*Please contact Blancco sales representative for more information about this new feature.
